QR Code is a kind of Code

What's Code?

QR Code is a kind of Code

Binary code

QR Code is a kind of Code

How to transfer QR Code into binary code string?

QR Code is a kind of Code

Black is 1
White is 0

String:

11111110, 10000010, 10111010,
10111010, 10111010, 10000010,
11111110, 00000000

Just an example to help
understanding, not
accurate.

First from left to right

Diagram illustrating a 15x15 grid layout, likely representing a dark module layout. The grid is divided into four quadrants by a central cross. Each quadrant contains a 3x3 grid of squares. The top-left and bottom-right quadrants are labeled "Dark Module" with a red arrow pointing to the top-left square. The top-right and bottom-left quadrants are labeled "Light Module" with a red arrow pointing to the top-right square. The grid is numbered 0 to 14 on the top and left sides.
